

## *Business Process Management for the Efficient Enterprise*

Now, more than ever, organizations are investing in business process management (BPM) to enhance efficiency and comply more effectively with government regulations. Companies in virtually every industry, including many of the Global 2000 as well as major government and public sector organizations rely on Verity LiquidOffice, Verity's enterprise-class BPM platform.

LiquidOffice is a comprehensive BPM solution for managing the entire process lifecycle featuring:

- Completely integrated design and modeling environment for processes, rules and forms.
- Scalable orchestration of workflows including user-determined workflows
- Comprehensive monitoring, reporting and analysis
- Standards-based robust business system and human interfaces

The latest release of Verity LiquidOffice redefines business process management in the enterprise with powerful new capabilities that provide even greater visibility into the content and processes that drive large-scale organizations. As the first and only BPM solution with enterprise-class, real-time full-text search, LiquidOffice v4.0 enables access to time-sensitive critical content at its origin. All configurations of LiquidOffice have also been strengthened with greater workflow control, core architectural upgrades, enterprise-strength security, and a suite of end-user enhancements.

### **Get Real-time Access to Information**

LiquidOffice adds breakthrough functionality—the built-in ability to extract insight from in-process content through enterprise-class advanced search. This means employees can use in-process content to identify key trends earlier, alert appropriate personnel, and solve real business problems in real time.

### **Accommodate Growth and Complexity**

LiquidOffice is now underpinned by a highly scalable, fault-tolerant, multi-server architecture that allows you to accommodate the growth of people, processes and information across your enterprise.

### **Enforce Compliance Regulations More Effectively**

LiquidOffice provides a secure audit trail that lets organizations track business activity at every step of a structured workflow process. Advanced support for electronic signatures has also been added.

### **Optimize the Form Design and End-user Experience**

LiquidOffice delivers the most complete range of form design and usability tools available including a suite of new capabilities such as Automated Form Table Builder and HTML ink pictures.

### **Key LiquidOffice v4.0 Features**

#### **New! In-process Search**

The first and only BPM solution with enterprise-class, full-text search enabling access to time-sensitive content at its origin and throughout the process lifecycle.

#### **New! Expanded Tracking**

LiquidOffice strengthens the secure audit trail that enterprises need for compliance efforts by providing administrators with even more ways to monitor form transactions and activity in the Management Console.

#### **New! Server Redundancy and Scalability**

Now capable of being deployed in a multi-server environment offering superior scalability and ensuring 24/7 uptime for critical applications.

#### **New! Attachment Integration**

LiquidOffice SDK available to integrate with one or more document management systems for attachment handling.

#### **New! Multiple Language Support**

Unicode character sets can be used throughout LiquidOffice, allowing enterprises to extend the reach of their business processes internationally.

#### **New! Testable Signature Integrity within HTML**

Enterprises can now validate HTML electronic signatures for authenticity, enabling more effective compliance with government mandates for legally binding signatures.

#### **New! HTML Ink Pictures**

LiquidOffice provides a place where users can freely “write” using a mouse or stylus/digitizer device. The actual writing, often a signature, is displayed on the form.

#### **New! Table Builder**

Simplify table building in form design. Fixed-size tables are now available to act as data collection objects for collecting repeated items.

#### **New! Calendar Control**

Enterprises can add a graphical date picker or “Calendar Control” to an HTML or InfoPath form.

## Verity and Intellectual Capital Management

Verity provides software that enables organizations to maximize the return on their intellectual capital investment. The company's intellectual capital management (ICM) solutions provide integrated search, classification, recommendation, monitoring and analytics across the real-time flow of enterprise information, along with self-service Q & A. In addition, Verity's business process management and content capture solutions activate information and accelerate its flow from person to person and between systems. Verity technology also serves as a core component of more than 260 applications from leading independent software vendors.

Around the world, more than 11,500 organizations of all sizes and types rely on Verity to manage their intellectual capital. In the private sector, these include ABB, AT&T, AXA, Bristol-Myers Squibb, Capgemini, Ernst & Young, Capital One, Cisco, Deloitte Consulting, EDGAR Online, Ford, GMAC, Hewlett-Packard, Kaiser Permanente, KPMG, Mayo Foundation, PricewaterhouseCoopers, SAP, UBS and Verizon. In the public sector, customers come from all levels and branches of government, including the U.S. General Services Administration, the U.S. Air Force and Army, the U.S. Department of Defense, including the armed forces units, and the U.S. Departments of Energy and Justice. Independent software vendors that integrate Verity include EMC Documentum, FileNet, Lotus, Oracle, Stellent and TIBCO.
